

AI Islamic Teacher MVP v1.0

Product Requirements Document (PRD)

Product Vision

An AI-powered Islamic teacher that delivers structured daily lessons, adapts to the student's learning level, asks questions, evaluates understanding, answers follow-up questions from trusted sources, and tracks learning progress over time.

Core User Journey

Login → Continue Today's Lesson → Read/Listen → Interactive Discussion → Quiz → AI Feedback → Ask Questions → Progress Updated → Next Lesson Unlocked

Feature 1: Student Authentication

Email Login, Google Login, Password Reset, User Profile.

Feature 2: Learning Profile

Child, Teen, Adult, New Muslim. AI adjusts language complexity and teaching style.

Feature 3: Structured Curriculum

Human-designed curriculum. Initial courses: Aqeedah, Salah, Seerah.

Feature 4: Daily Lesson System

Learning Objectives, Main Lesson, Examples, Reflection, Summary, References.

Feature 5: AI Voice Teacher

Lesson narration with adjustable speed and playback controls.

Feature 6: Explain Differently

Explain simply, like a child, with analogy, example, or summary.

Feature 7: Reflection Engine

Student reflections with AI-generated feedback.

Feature 8: Quiz Engine

Multiple choice, True/False, Short Answer, Reflection Questions.

Feature 9: AI Quiz Evaluation

Score, improvement areas, review recommendations.

Feature 10: Ask the Teacher

Q&A; with citations from approved Islamic sources.

Feature 11: Source Transparency

Display Quran, Hadith, Tafsir, and scholarly references used.

Feature 12: Progress Dashboard

Progress percentage, quiz averages, streaks, weak areas.

Feature 13: AI Memory

Track completed lessons, scores, reflections, and questions.

Feature 14: Weakness-Based Revision

Personalized review lessons based on weak topics.

Feature 15: Daily Learning Streak

Track consistent learning habits.

Feature 16: End of Module Assessment

Comprehensive review and evaluation.

Feature 17: Admin Curriculum Portal

Manage courses, modules, lessons, and references.

Technology Stack

Frontend: Next.js, TypeScript, Tailwind CSS

Backend: Supabase

AI: OpenAI GPT-5

Voice: ElevenLabs or Azure Speech

Automation: n8n

Out of Scope for MVP

Parent Dashboard, Certificates, Mobile Apps, WhatsApp Bot, Tajweed Correction, Live Voice Tutor, Community Forum, Leaderboards, Multi-Scholar Agents, School Management.

Success Criteria

Students can learn daily lessons, listen to audio, ask questions, complete quizzes, receive personalized feedback, follow revision plans, and track progress.
